UPI MARKET ANALYSIS- 3 KEY INSIGHTS

Insight 1: Volume-Value Divergence

UPI volume grew 32% YoY in FY25 but value grew only 21%. Average ticket size falling, mass adoption driving micro-payments.

Insight 2 : Merchant Payments Dominating

P2M now leads in volume share. 86% of merchant payments below ₹500. Huge opportunity in high-value merchant verticals.

Insight 3 : Geographic Concentration

- Top 3 states account for 20% of all transactions.
- Tier-2/3 penetration is the next UPI growth frontier.

Recommendation:

- **Banks should launch UPI products targeting**
- **Tier-2 merchants : volume exists but high-value use cases are underpenetrated.**
